Call Control System

Telstar^{*} system adds to what your phone can do for you.

- **Voice Synthesis.** Talks to you and callers with a friendly, life-like voice synthesis that's clear and easy to understand.
- **50 name directory for convenient dialing.** Store 50 numbers and reach them by just dialing their corresponding names on your Touch-Tone[®] telephone keypad.
- **Stores 30 calls for you.** Telstar^{*} system's friendly voice tells callers to leave their number, which is stored in the system's memory. When you check for messages, the voice reports the numbers that called and the time of the call.
- **Call Screening.** Identify the calls you want to receive and the system will announce them, recording all others.
- **2 button emergency calling.** System provides fast, reliable two button dialing for medical, police, and emergency numbers.
- **Call Forward Announcement.** Lets you tell callers where you may be reached. You can change the number as needed, even from remote locations.
- **Last Number Dialed.** Automatically remembers last number dialed, especially helpful when numbers are busy or unanswered.
- **Remote Access.** Call your Telstar^{*} call control system from any Touch-Tone[®] phone to receive messages and use other features.
- **Built-In Calendar Clock.** Automatically logs the time and date of incoming calls. Voice synthesis tells you time and date.
- **Security Controlled Access.** Your special code prevents unauthorized access to your system.
- **Easy To Program.** Friendly voice leads you step-by-step through programming instructions.
- **Additional Features.** Telstar^{*} system includes Intercom, Hold, Long Distance Restriction, and more.
